Contents of Volume 83

Number 1, 7 March 1980

OKAMOTO, M., KATSURAYAMA, A., TSUKIJI, M., ASO, Y. and HAYASHI, K., Dynamic Behaviour of Enzymatic System Realizing Two-factor Model	1
GLADYSHEV, G. P., ERSHOV, Yu. A. and LOSHCHILOV, V. I., Thermodynamic Principles of the Behaviour of Biological Systems .	17
ADAMS, V. D., DEANGELIS, D. L. and GOLDSTEIN, R. A., Stability Analysis of the Time Delay in a Host-parasitoid Model . . .	43
WEINBAUM, S., Theory for the Formation of Intercellular Junctions Based on Intramembranous Particle Patterns Observed in the Freeze Fracture Technique	63
SPARROW, C., Bifurcations and Chaotic Behaviour in Simple Feedback Systems	93
MARTINDALE, S., On the Multivariate Analysis of Avian Vocalizations	107
KAMO, N., KASHIWAGURA, T., KURIHARA, K. and KOBATAKE, Y., A Theory of Dynamic and Steady Responses in Chemoreception .	111
KIJIMA, H., KIJIMA, S., NOGUCHI, M. and MORITA, H., Co-operative Response of Chemically Excitable Membrane III. Three State Model	131
DIX, D., COHEN, P. and FLANNERY, J., On the Role of Aging in Cancer Incidence	163
GREADY, J. E., Elaboration of Microscopic and Macroscopic Theories of Enzyme Action: with implications for Enzyme Evolution, Reversibility and Kinetics	175
LETTER TO THE EDITOR	
SPARKLING, D. W. and WILLIAMS, J. D., Reply to Martindale—On the Multivariate Analysis of Avian Vocalizations . . .	193

Number 2, 21 March 1980

LEVINE, S., Several Measures of Trophic Structure Applicable to Complex Food Webs	195
WATARI, H., ISOGAI, Y. and NISHIKAWA, H., Graphic Method for Determination of Allosteric Constants	209
HARRIS, W. F. and ERICKSON, R. O., Tubular Arrays of Spheres: Geometry, Continuous and Discontinuous Contraction, and the Role of Moving Dislocations	215
MORPURGO, G., PORRO, M. N., PASSI, S. and FANNELLI, C., The Role of U.V. Light in the Control of Melanogenesis	247
HOLMES, M. G. and WAGNER, E., A re-evaluation of Phytochrome Involvement in Time Measurement in Plants	255
GROSSMAN, Z. and BERKE, G., Tumor Escape from Immune Elimination	267
SCHMITZ, K. S. and RAMANATHAN, B., Generation of a Third-order Folded Structure for Chromatin	297
MORTOLA, J. P. and MORTOLA, S. A., Tracheal Slowly Adapting Stretch Receptors: Theoretical Models	313
BHAT, N. and PANDE, L. K., Three-species Ecosystems in a Solvable Model	321
WATKINSON, A. R., Density-dependence in Single-species Populations of Plants	345

LETTERS TO THE EDITOR

SHINAGAWA, Y., Invalidity of the Henderson Diffusion Equation Shown by the Exact Solution of the Nernst-Planck Equations	359
WISEMAN, L. L., Phase Inversion in Embryonic Tissue Engulfment Experiments: Tissue Size if Not the Important Variable	365
MATTHEWS, H. R., Chromosome Condensation in Mitosis	367
JAGADEESWARAN, P. and CHERAYIL, D., A General Model for the Conformational Switch in 5S RNA During Protein Synthesis	369

Number 3, 7 April 1980

TUCKWELL, H. C. and COPE, D. K., Accuracy of Neuronal Interspike Times Calculated from a Diffusion Approximation	377

WOLF, M. B., A Simulation Study of the Anomalous Osmotic Behaviour of Red Cells	687
LETTER TO THE EDITOR	
SILK, W. K. and ERICKSON, R. O., Local Biosynthesis Rates of Cytoplasmic Constituents in Growing Tissue	701

Index to Volume 83

- A.C. cable theory and its applications on the measurements of the membrane electric parameters, 595
- ADAMS, V. D., DEANGELIS, D. L. and GOLDSTEIN, R. A., Stability analysis of the time delay in a host-parasitoid model, 43
- Aging in cancer incidence, on the role of, 163
- Allosteric constants, graphic method for determination of, 209
- ARMON, C. and PALTÍ, Y., The weighted reversal potential—a tool to study refractoriness and regenerativity in nerves, 505
- Ascorbate, Cyclic nucleotides, citrus and a model for preventing large bowel cancer, 675
- ASO, Y. (see OKAMOTO, M.), 1
- Avian vocalizations, on the multivariate analysis of, 107
- Avian vocalizations, on the multivariate analysis of; reply to Martindale (letter), 193
- Bergmann's Rule, an energetics explanation of; optimum body sizes at different ambient temperatures, 579
- BERKE, G. (see GROSSMAN, Z.), 267
- BHAT, N. and PANDE, L. K., Three-species ecosystems in a solvable model, 321
- Bifurcation and chaotic behaviour in simple feedback systems, 93
- Binding systems, comparison between the kinetics of heterogeneous and sequentially co-operative, 447
- Biological systems, thermodynamic principles of the behaviour of, 17
- Biosynthesis rates, local, of cytoplasmic constituents in growing tissue (letter), 701
- Biphasic kinetic systems, application of non-linear least squares fitting to analysis of inhibition in (letter), 527
- Body sizes, optimum, at different ambient temperatures: an energetics explanation of Bergmann's Rule, 579
- BOEYNAEMS, J. M. and CANTRAINE, F. R. L., Comparison between the kinetics of heterogeneous and sequentially co-operative binding systems, 447
- Bowel cancer, ascorbate, cyclic nucleotides, citrus and a model for preventing large, 687
- BROWN, A. P., Evidence for remnants of an ordered codon sequence and a restructured codon composition in selected proteins, 537
- BROWN, R. J., Application of non-linear least squares fitting to analysis of inhibition in biphasic kinetic systems (letter), 527
- Calcium ions, bound, at the nerve cell surface, thermal aspects of electromagnetic field interactions with (letter), 517
- Cancer, large bowel, ascorbate, cyclic nucleotides, citrus and a model for prevention of, 675
- Cancer incidence, on the role of aging in, 163
- Cancer, skin, induction by chronic u.v. exposure of a human population, a dose-response model for, 487

- CANTRAINE, F. R. L. (see BOEYNAEMS, J. M.), 447
- Chaotic behaviour and bifurcation in simple feedback systems, 93
- Chemoreception, a theory of dynamic and steady responses in, 111
- CHERAYIL, D. (see JAGADEESWARAN, P.), 369
- Chromatin, generation of a third-order folded structure for, 297
- Chromosome condensation in mitosis (letter), 367
- Cirtus, ascorbate, cyclic nucleotides and a model for preventing large bowel cancer, 675
- Codon sequence, ordered, and a restructured codon composition in selected proteins, evidence for remnants of, 537
- COHEN, P. (see DIX, D.), 163
- Compartmentalization, regeneration and segmentation in *Drosophila* development, a model linking, 477
- Conflict: a necessary modification of Trivers' parent-offspring conflict model (letter), 533
- Conflict, intraspecific, prior fitness and the evolutionarily stable strategy for, 567
- COPE, D. K. (see TUCKWELL, H. C.), 377
- Cyclic nucleotides, ascorbate, citrus and a model for preventing large bowel cancer, 675
- Cytoplasmic constituents in growing tissue, local biosynthesis rates of (letter), 701
- DEANGELIS, D. L. (see ADAMS, V. D.), 43
- DE GRUIJL, F. R. and VAN DER LEUN, J. C., A dose-response model for skin cancer induction by chronic u.v. exposure of a human population, 487
- Density-dependence in single-species populations of plants, 345
- Dislocations, moving, in tubular arrays of spheres, 215
- Distribution model of human ovulatory cycles, 663
- DIX, D., COHEN, P. and FLANNERY, J., On the role of aging in cancer incidence, 163
- DNA fragments, eukaryotic, containing interspersed repeats, reassociation of, 389
- Dynamic and steady responses in chemoreception, a theory of, 111
- Dynamic behaviour of enzymatic system realizing two-factor model, 1
- Ecosystems, three-species, in a solvable model, 321
- Electromagnetic field interactions with bound calcium ions at the nerve cell surface, thermal aspects of (letter), 517
- Embryonic tissue engulfment experiments, phase inversion in; tissue size is not the important variable (letter), 365
- Enzymatic system realizing two-factor model, dynamic behaviour of, 1
- Enzyme action, elaboration of microscopic and macroscopic theories of; with implications for enzyme evolution, reversibility and kinetics, 175
- ERICKSON, R. O. (see HARRIS, W. F.), 215
- ERICKSON, R. O. (see SILK, W. K.), 701
- Error propagation, testing model of, 561
- ERSHOV, Yu, A. (see GLADYSHEV, G. P.), 17
- Eukaryotic DNA fragments containing interspersed repeats, reassociation of, 389
- Evolution and metabolism, the necessary distinction between; a comment on the thermodynamics of evolution (letter), 523

- Eukaryotic precursor RNA, three dimensional structure and sequence homology determine splicing sites in, 647
- FANNELLI, C. (see MORPURGO, G.), 247
- Feedback systems, bifurcation and chaotic behaviour in simple, 93
- FLANNERY, J. (see DIX, D.), 163
- Food webs, complex, several measures of trophic structure applicable to, 195
- Freeze fracture technique, theory for the formation of intercellular junctions based on intramembranous particle patterns observed in, 63
- GALLANT, J. A. and PROTHERO, J., Testing model of error propagation, 561
- GASARYAN, K. G. (see GOLTSOV), 389
- Genetic information and correction of the proof, simple derivation of the function of (letter), 525
- GLADYSHEV, G. P., ERSHOV, Yu. A. and LOSHCHILOV, V. I., Thermodynamic principles of the behaviour of biological systems, 17
- Gluconeogenic lactate metabolism, a dynamic model of; liver redox resistance, 623
- GOLDSTEIN, R. A. (see ADAMS, V. D.), 43
- GOLTSOV, V. A., MAZO, M. A., TARANTUL, V. Z. and GASARYAN, K. G., Reassociation of eukaryotic DNA fragments containing interspersed repeats, 389
- GREADY, J. E., Elaboration of microscopic and macroscopic theories of enzyme action: with implications for enzyme evolution, reversibility and kinetics, 175
- GROOME, L. J., A two-state tension-displacement model for hemoglobin-ligand binding, 477
- GROSSMAN, Z. and BERKE, G., Tumor escape from immune elimination, 267
- HARPER, E. T. (see SABESAN, M. N.), 457
- HARRIS, W. F. and ERICKSON, R. O., Tubular arrays of spheres: geometry, continuous and discontinuous contraction, and the role of moving dislocations, 215
